Jay W. Forrester: Industrial Dynamics

1. Prequel: Boston 1970

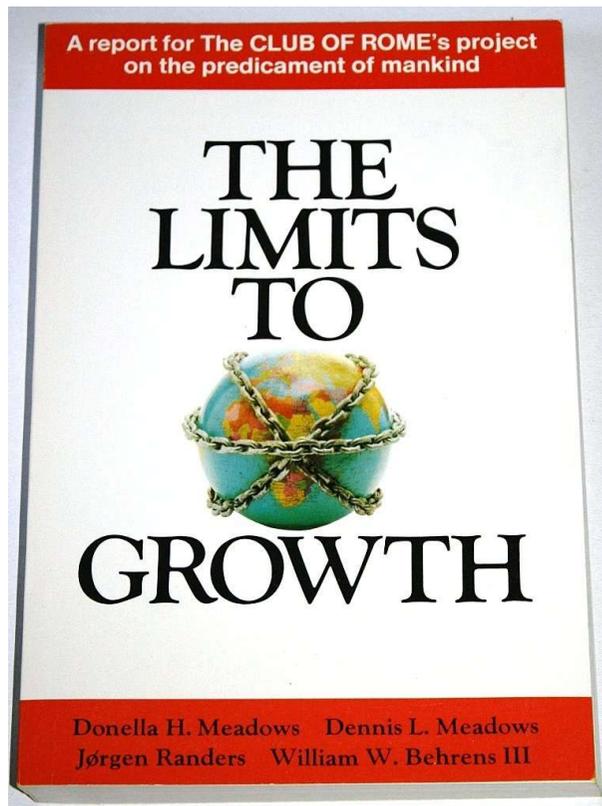

1. Prequel: Boston 1970

- Club of Rome
- World Model Simulations
- Five main sectors
 1. Population
 2. Industrial output
 3. Pollution
 4. Food production
 5. Non-renewable resources
- Time horizon: 1900 - 2100

1. Prequel: Boston 1970

- The results are still valid!
- The method shows the power of
 - Expertise from various domains
 - Systems dynamics as lingua franca
 - Process oriented
 - Counter-intuitive behavior of complex non-linear systems with closed loops

2. Sustainable Development Goals (SDGs)

2. Sustainable Development Goals (SDGs)

United Nations A/RES/70/1

 **General Assembly** Distr.: General
21 October 2015

Seventieth session
Agenda items 15 and 116

Resolution adopted by the General Assembly on 25 September 2015

[without reference to a Main Committee (A/70/L.1)]

70/1. Transforming our world: the 2030 Agenda for Sustainable Development

The General Assembly
Adopts the following outcome document of the United Nations summit for the adoption of the post-2015 development agenda:

Transforming our world: the 2030 Agenda for Sustainable Development

Preamble

This Agenda is a plan of action for people, planet and prosperity. It also seeks to strengthen universal peace in larger freedom. We recognize that eradicating poverty in all its forms and dimensions, including extreme poverty, is the greatest global challenge and an indispensable requirement for sustainable development.

All countries and all stakeholders, acting in collaborative partnership, will implement this plan. We are resolved to free the human race from the tyranny of poverty and want and to heal and secure our planet. We are determined to take the bold and transformative steps which are urgently needed to shift the world on to a sustainable and resilient path. As we embark on this collective journey, we pledge that no one will be left behind.

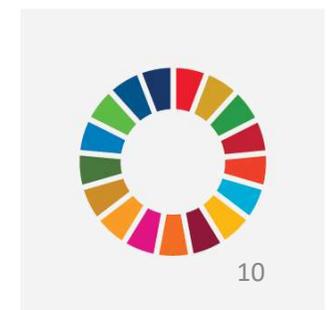

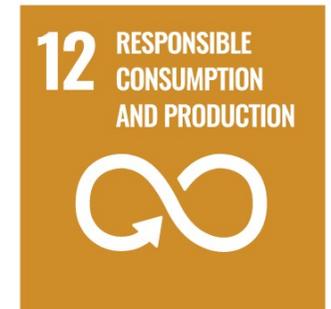

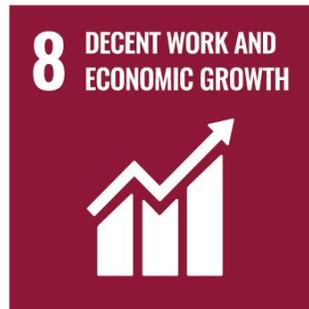

The 17 Sustainable Development Goals and 169 targets which we are announcing today demonstrate the scale and ambition of this new universal Agenda. They seek to build on the Millennium Development Goals and complete what they did not achieve. They seek to realize the human rights of all and to achieve gender equality and the empowerment of all women and girls. They are integrated and indivisible and balance the three dimensions of sustainable development: the economic, social and environmental.

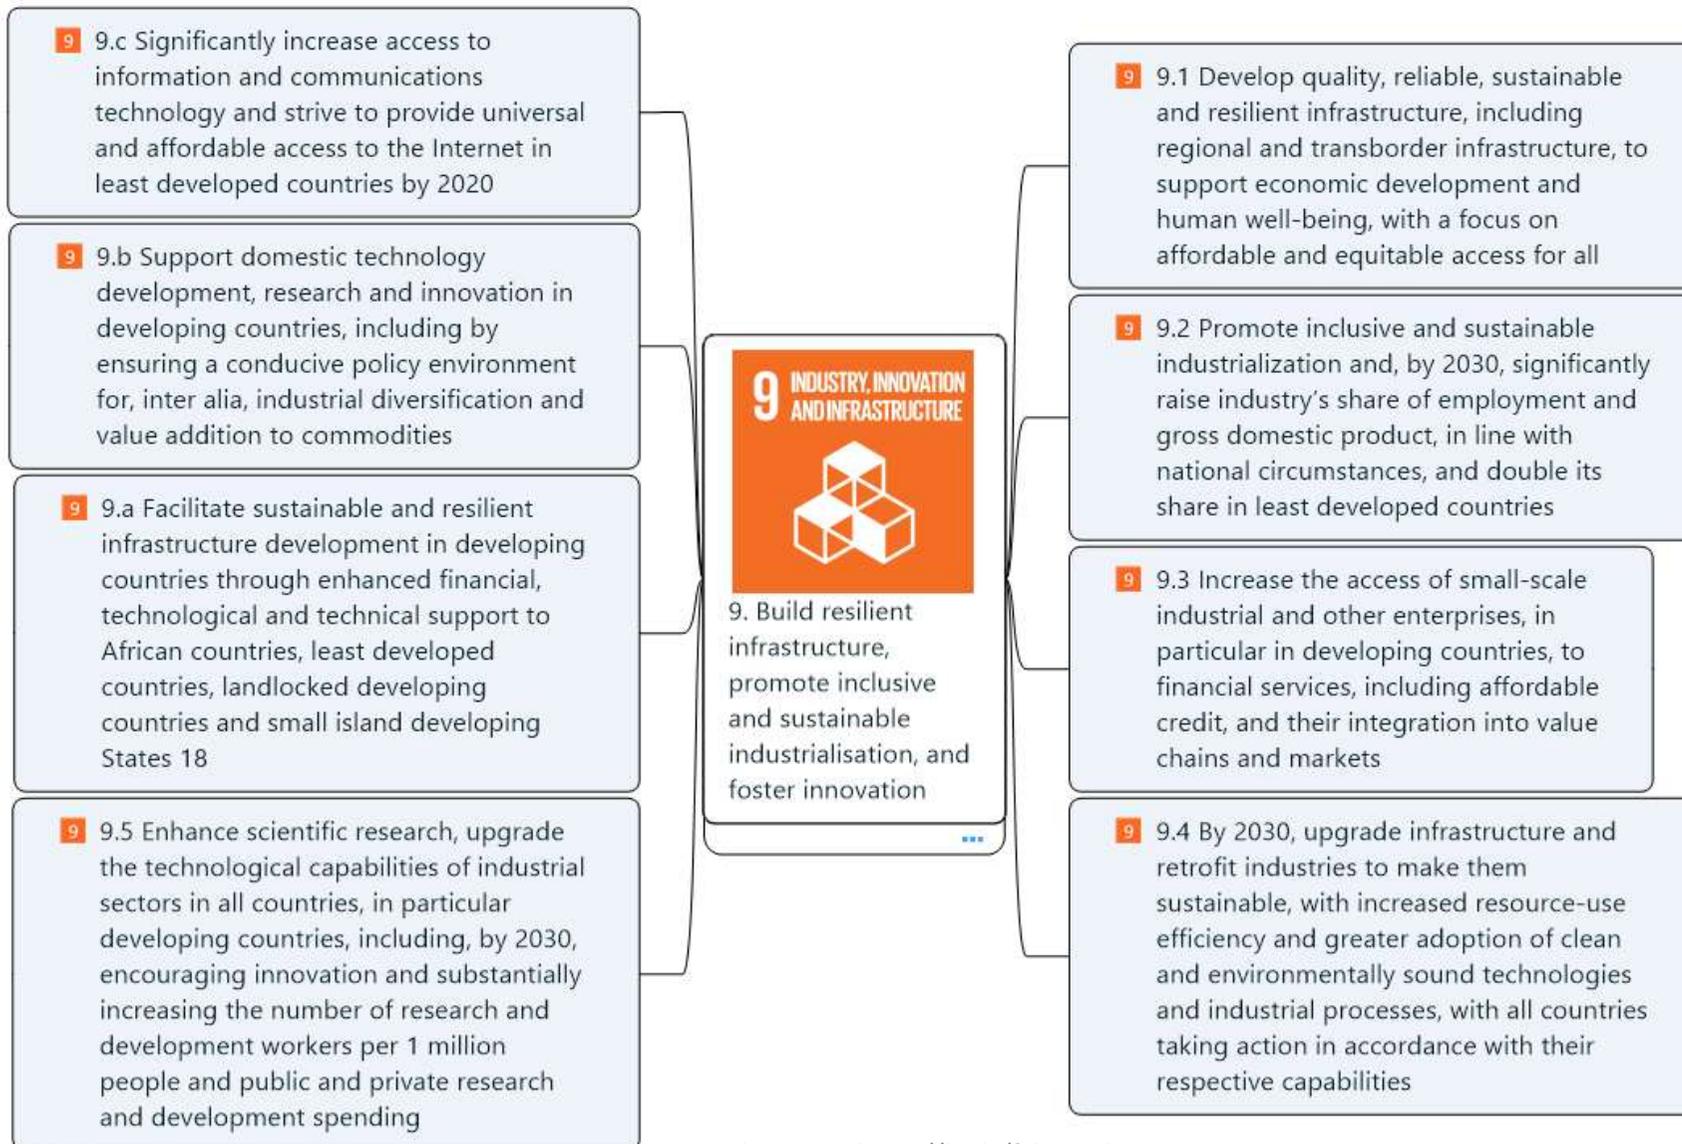

The Goals and targets will stimulate action over the next 15 years in areas of critical importance for humanity and the planet.

15-16301 (E)   Please recycle 

- Why?
 - Outcome of worldwide bottom-up process
- What?
 - Goals 17, Targets 169, Indicators 242+
- When?
 - 2016 - 2030
- Who?
 - Agreed by all 193 UN member states
- Responsible?
 - Implementation by national governments
- Costs?
 - Required budgets: trillions of US\$ a year
- Bottom line:
 - LEAVE NO ONE BEHIND

SUSTAINABLE DEVELOPMENT GOALS

2. Sustainable Development Goals (SDGs)

SDR 2025

Overall score

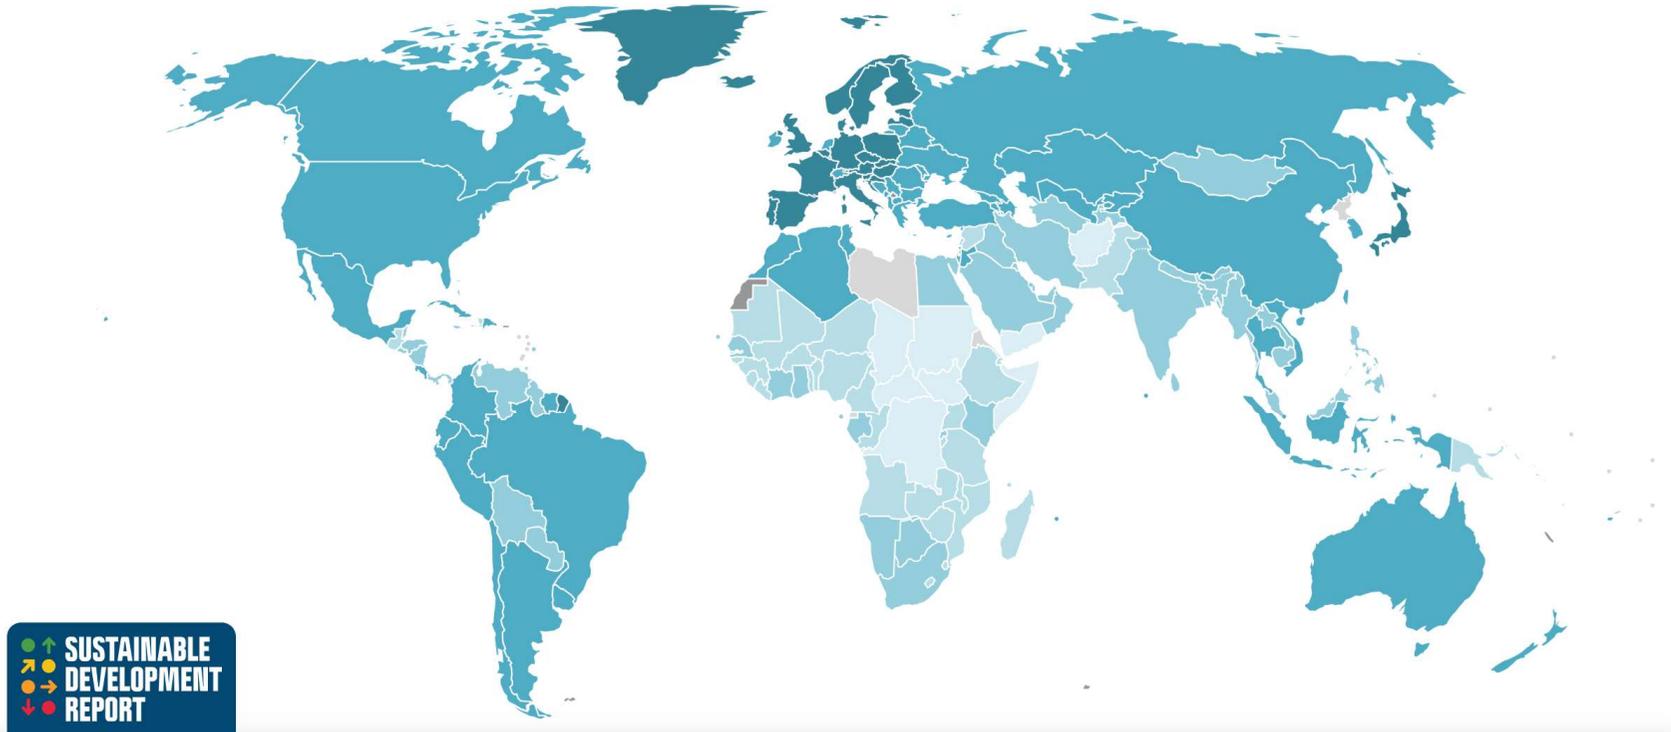

Legend

Click on a country to see its performance.

- > 80
- 70 - 80
- 60 - 70
- 50 - 60
- < 50
- Information unavailable

Description

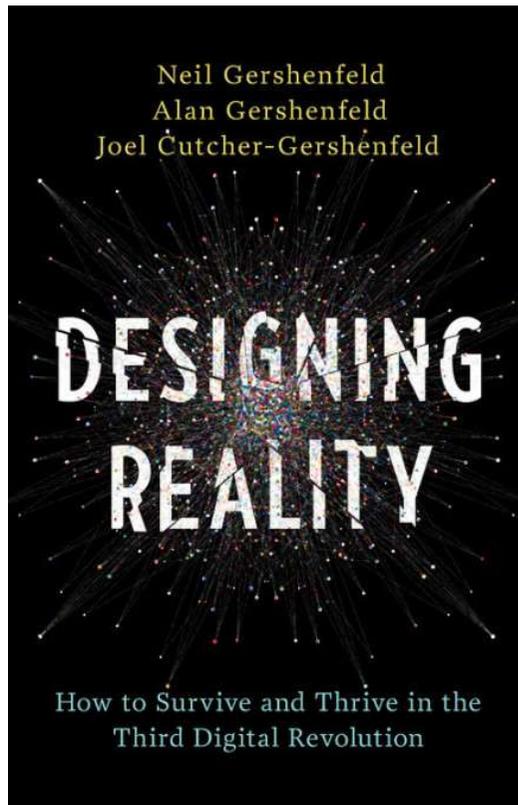

The overall score measures the total progress towards achieving all 17 SDGs. The score can be interpreted as a percentage of SDG achievement. A score of 100 indicates that all SDGs have been achieved.

All data presented on this website are based on the publication Sachs, J.D., Lafortune, G., Fuller, G., Iablonovski, G. (2025). Financing Sustainable Development to 2030 and Mid-Century. Sustainable Development Report 2025. Paris: SDSN, Dublin: Dublin University Press. DOI: <https://doi.org/10.25546/111909>

3. Designing Reality

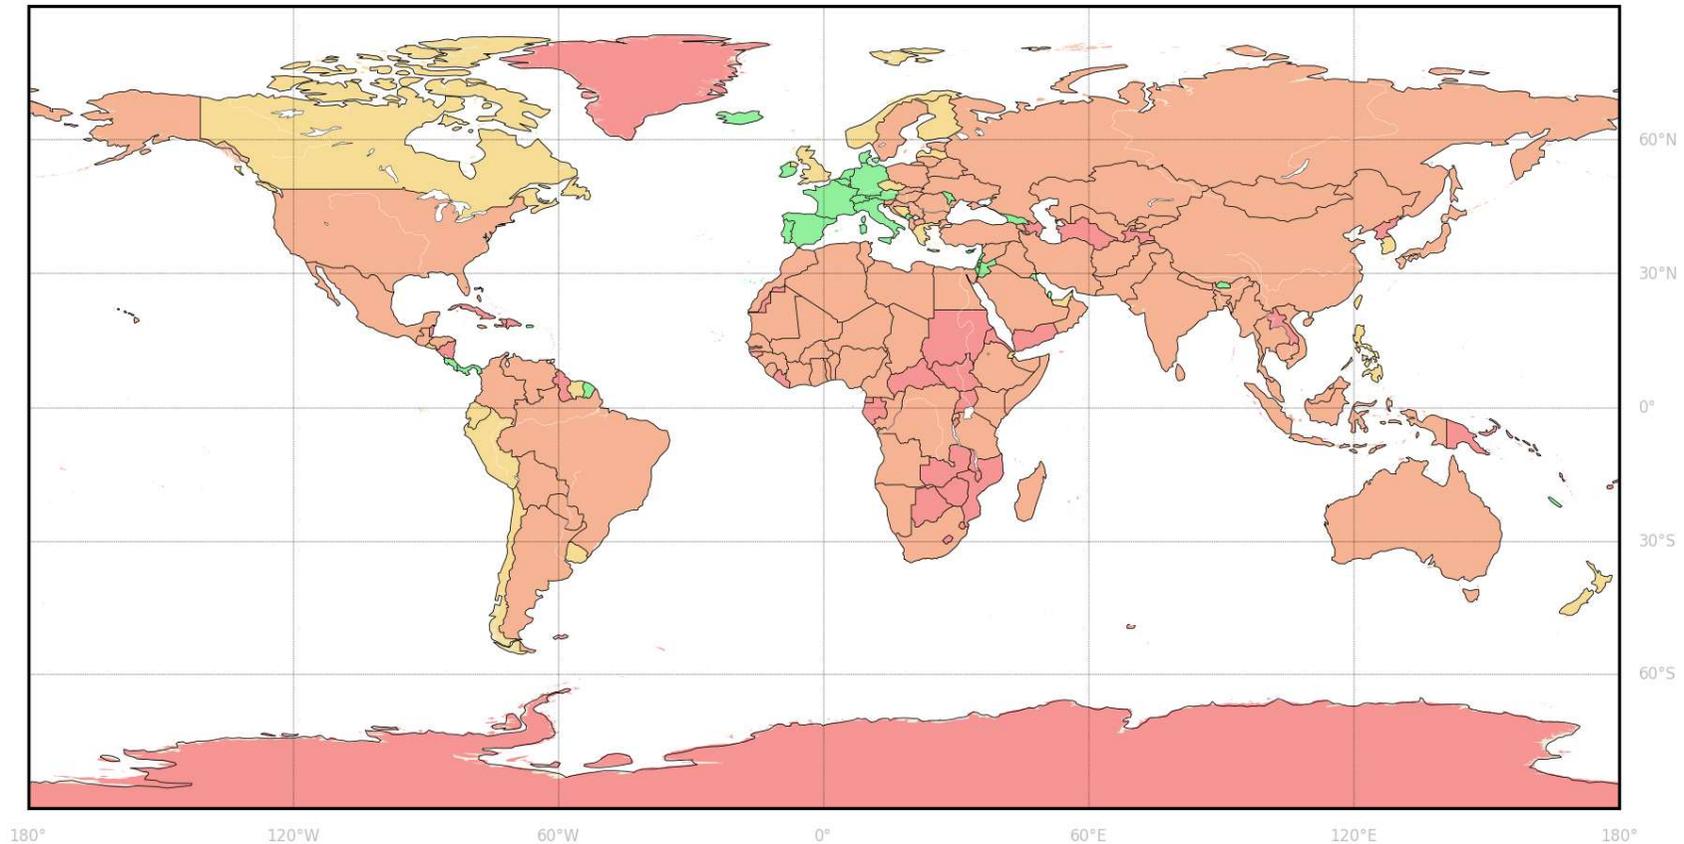

3. Designing Reality

- Fablabs and SDGs
 - Social justification of fablabs requires social impact; self expression is not enough
 - SDG implementers need fablabs
 - Fablabs have a lot to offer
 - Fab network presence in many countries
 - Loosely interconnected, common values, locally grounded
 - Developing solutions in its DNA

World: Fablab Density by Country

Legend: red: no fablabs, orange: no criteria met, yellow: one criterion met, green: both criteria met
Criteria: no. of fablabs per mil inhabitants >1.0 and/or no. of fablabs per 10,000 km² area > 1.0

World: fablabs: 2,626; countries: 250; retrieved: 2026-02-28

Sources: fablabs.io; countries: wikipedia/iso-3166; geodata: naturalearth and geonames

4. Fablab SDG Profiles

4. Fablab SDG Profiles

4 7 9 17 FAB LAB UCV Fab Lab UCV Tarapoto

Fablab Status: Active

Fablab Type: Regular Fablab

Entity: Fablab

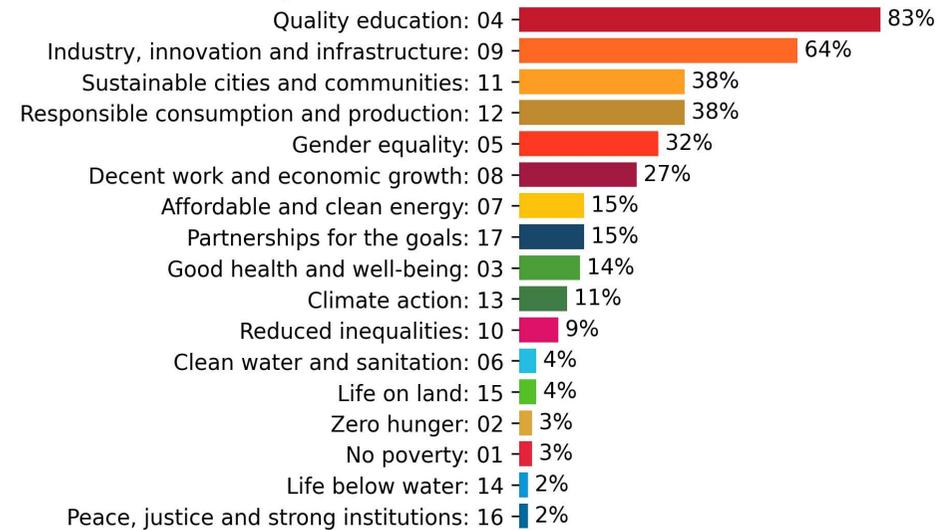

City	Tarapoto
Country	Peru
Continent	South America
Fablab SDG Profile	SDG-04-07-09-17
- SDG-04	- Quality education
- SDG-07	- Affordable and clean energy
- SDG-09	- Industry, innovation and infrastructure
- SDG-17	- Partnerships for the goals
Global SDG Profile Peers	6

- A Fablab SDG Profile is a fablabs preferred selection of 2-4 SDGs (out of 17)
- Actual (fabnetdata 2026-02-28):
 - Fablabs: 2626
 - Fab SDG Profiles: 598 = 23%

4. Fablab SDG Profiles

World: SDGs Prevalence in Fablab SDG Profiles

UN Sustainable Development Goals (SDGs):

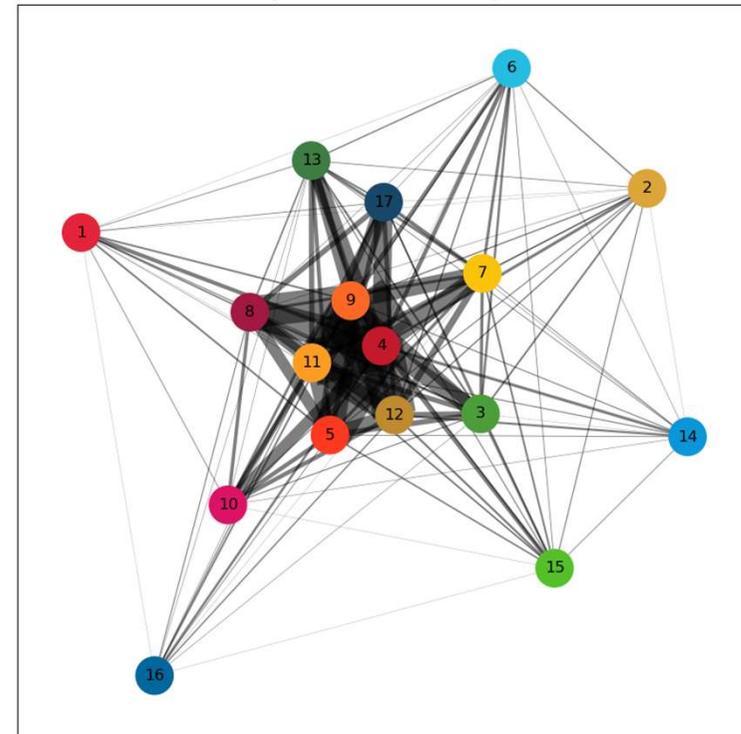

World: fablabs: 2,626; fablab sdg profiles: N = 598 (= 23 %); Fabnetdata retrieved: 2026-02-28

Note: A Fablab SDG Profile is a Fablab's preferred selection of 2-4 SDGs (out of 17)

4. Fablab SDG Profiles

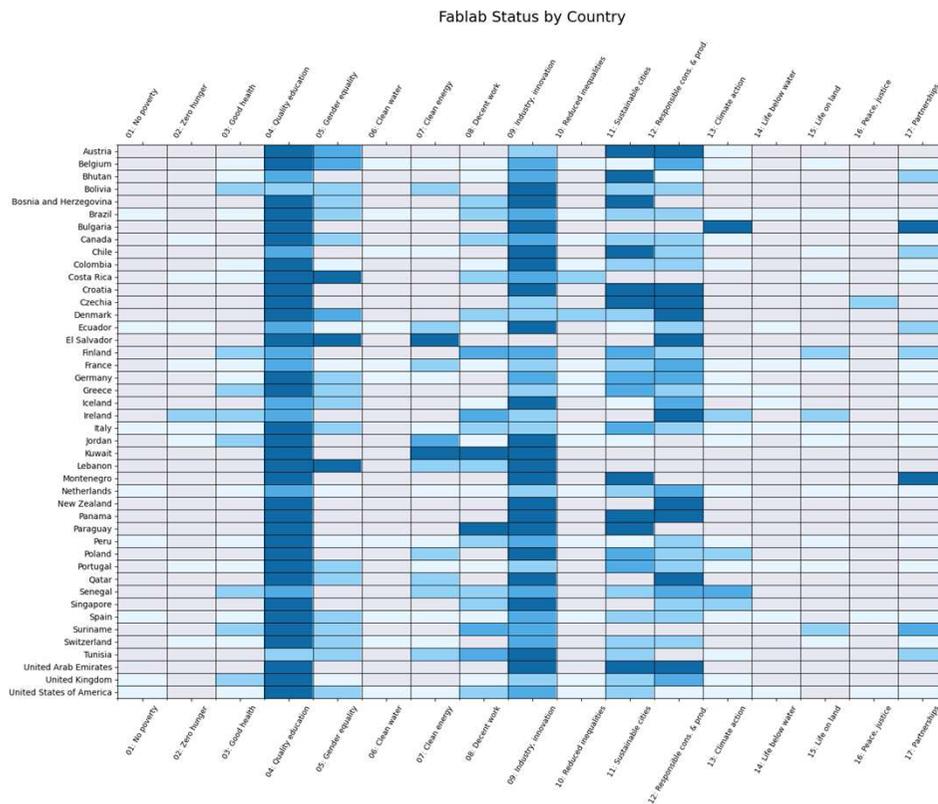

- Heatmap derived from SDG Index Report 2025

- Lines are countries
- Columns are SDG 01 – 17
- Color = “heat”
 - Green is best
 - Red is worst

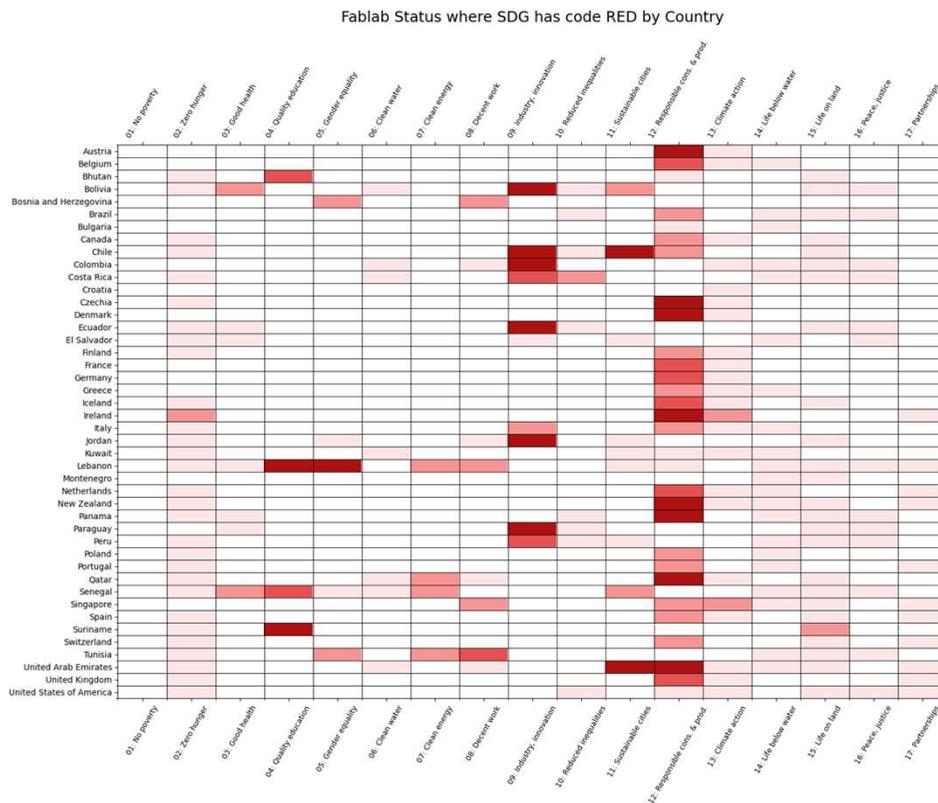

4. Fablab SDG Profiles

- Heatmap canvas re-used
- BLUE = Fablab SDG Profile prevalences

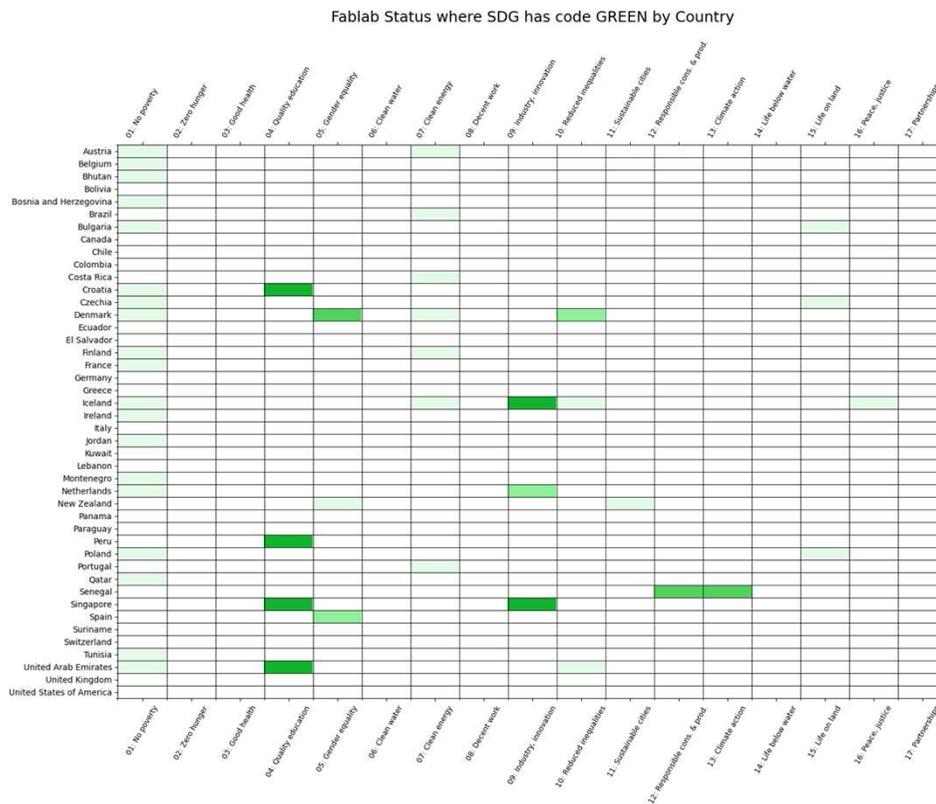

4. Fablab SDG Profiles

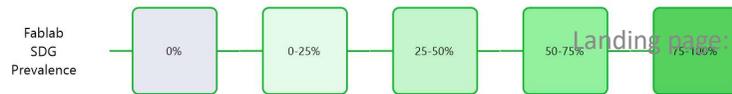

- Heatmap canvas re-used
- RED = Fablab SDG Profile prevalences for countries where code = RED
- *Fablab A in country B: as you have SDG N in your profile AND your country has code = RED for SDG N, you could have most impact by focusing on SDG N*

4. Fablab SDG Profiles

- Heatmap canvas re-used
- GREEN = Fablab SDG Profile prevalences for countries where code = GREEN
- *Fablab A in country B: as you have SDG N in your profile AND your country has code = GREEN for SDG N, you could be of valuable support for other fablabs in countries with code = RED for SDG N*

5. Calling Fab Network

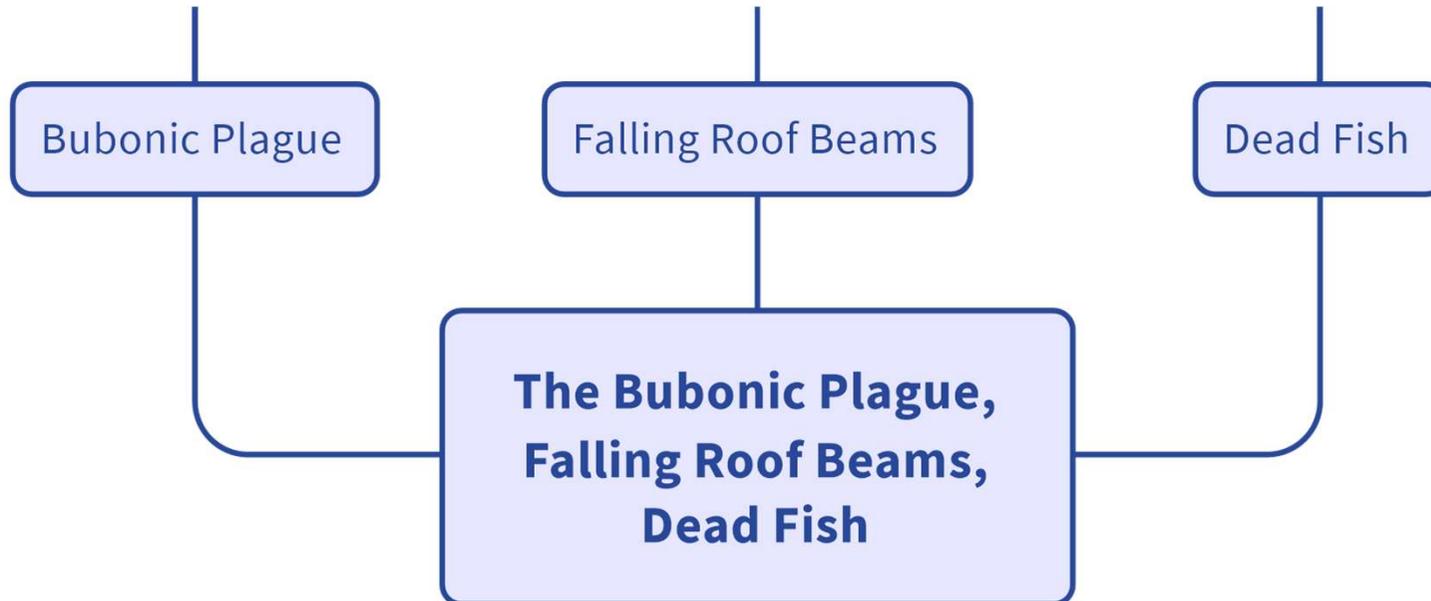

5. Calling Fab Network

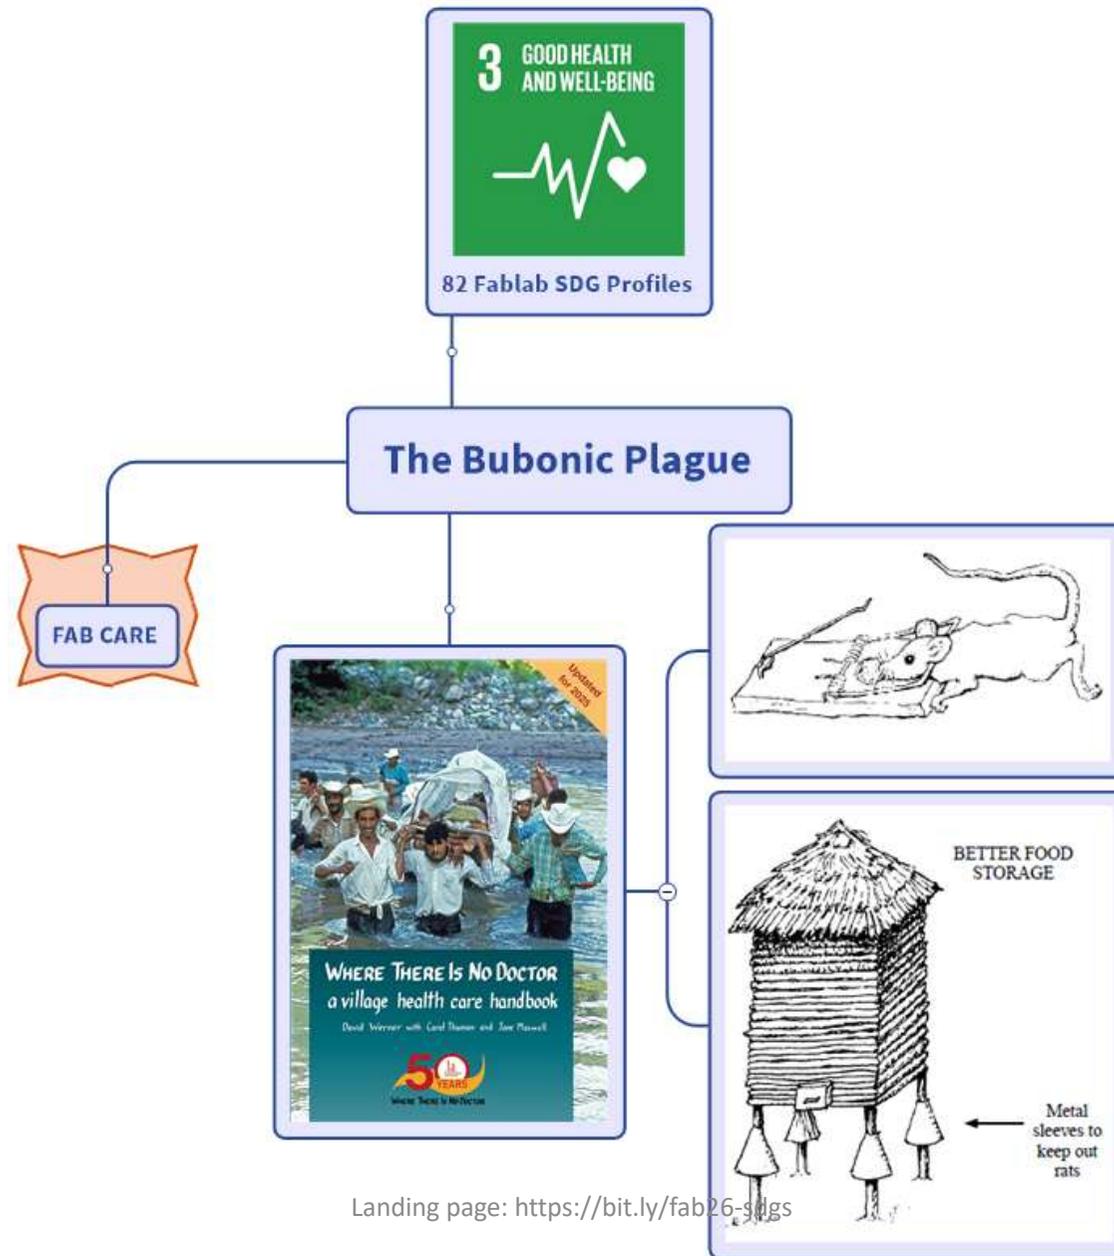

Suppose:

The island of Borneo, described as "a green jewel in the blue sea," has all of a sudden been beset with a multitude of seemingly unrelated problems. The villagers have begun dying of bubonic plague, the roofs of their huts have begun crashing down, and there are swarms of dead fish washing up on the banks of their rivers!

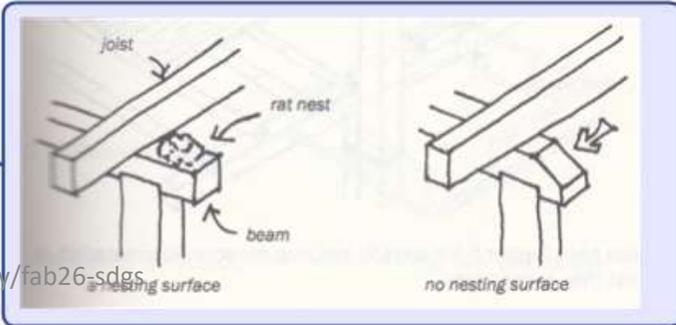

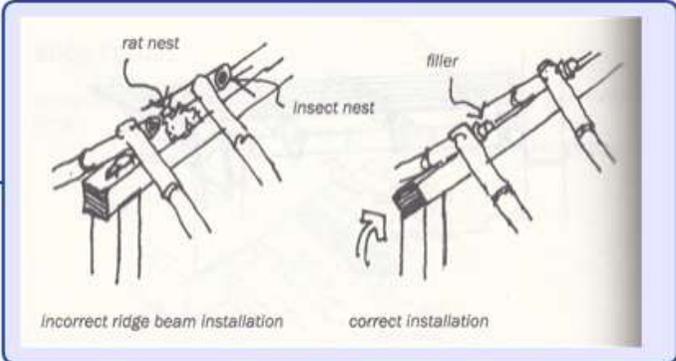

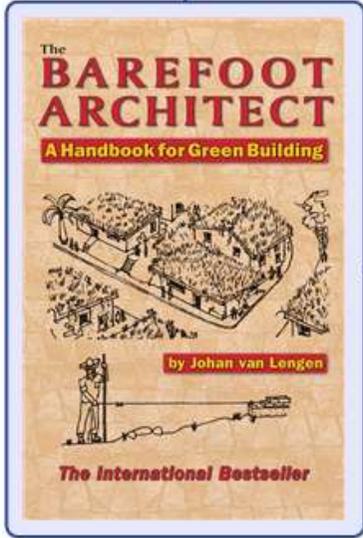

Picture left: Thunderbirds and Sustainability; temporary exhibition at Miraikan, National Museum of Emerging Science and Innovation, Tokyo, Japan during FAB8 Conference Yokohama, 2012 (coincidence?)

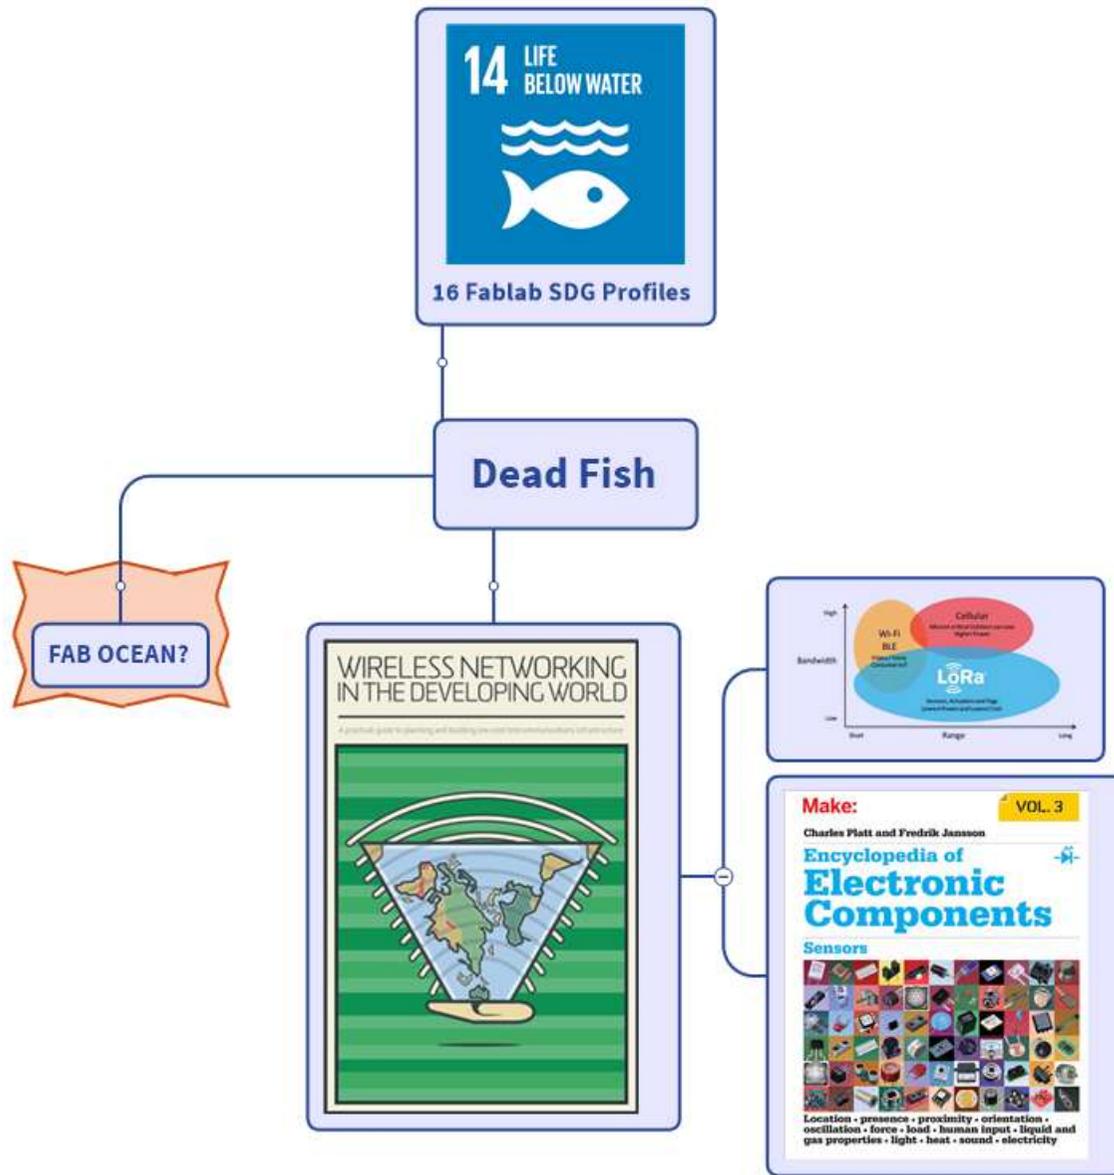

Falling Roof Beams

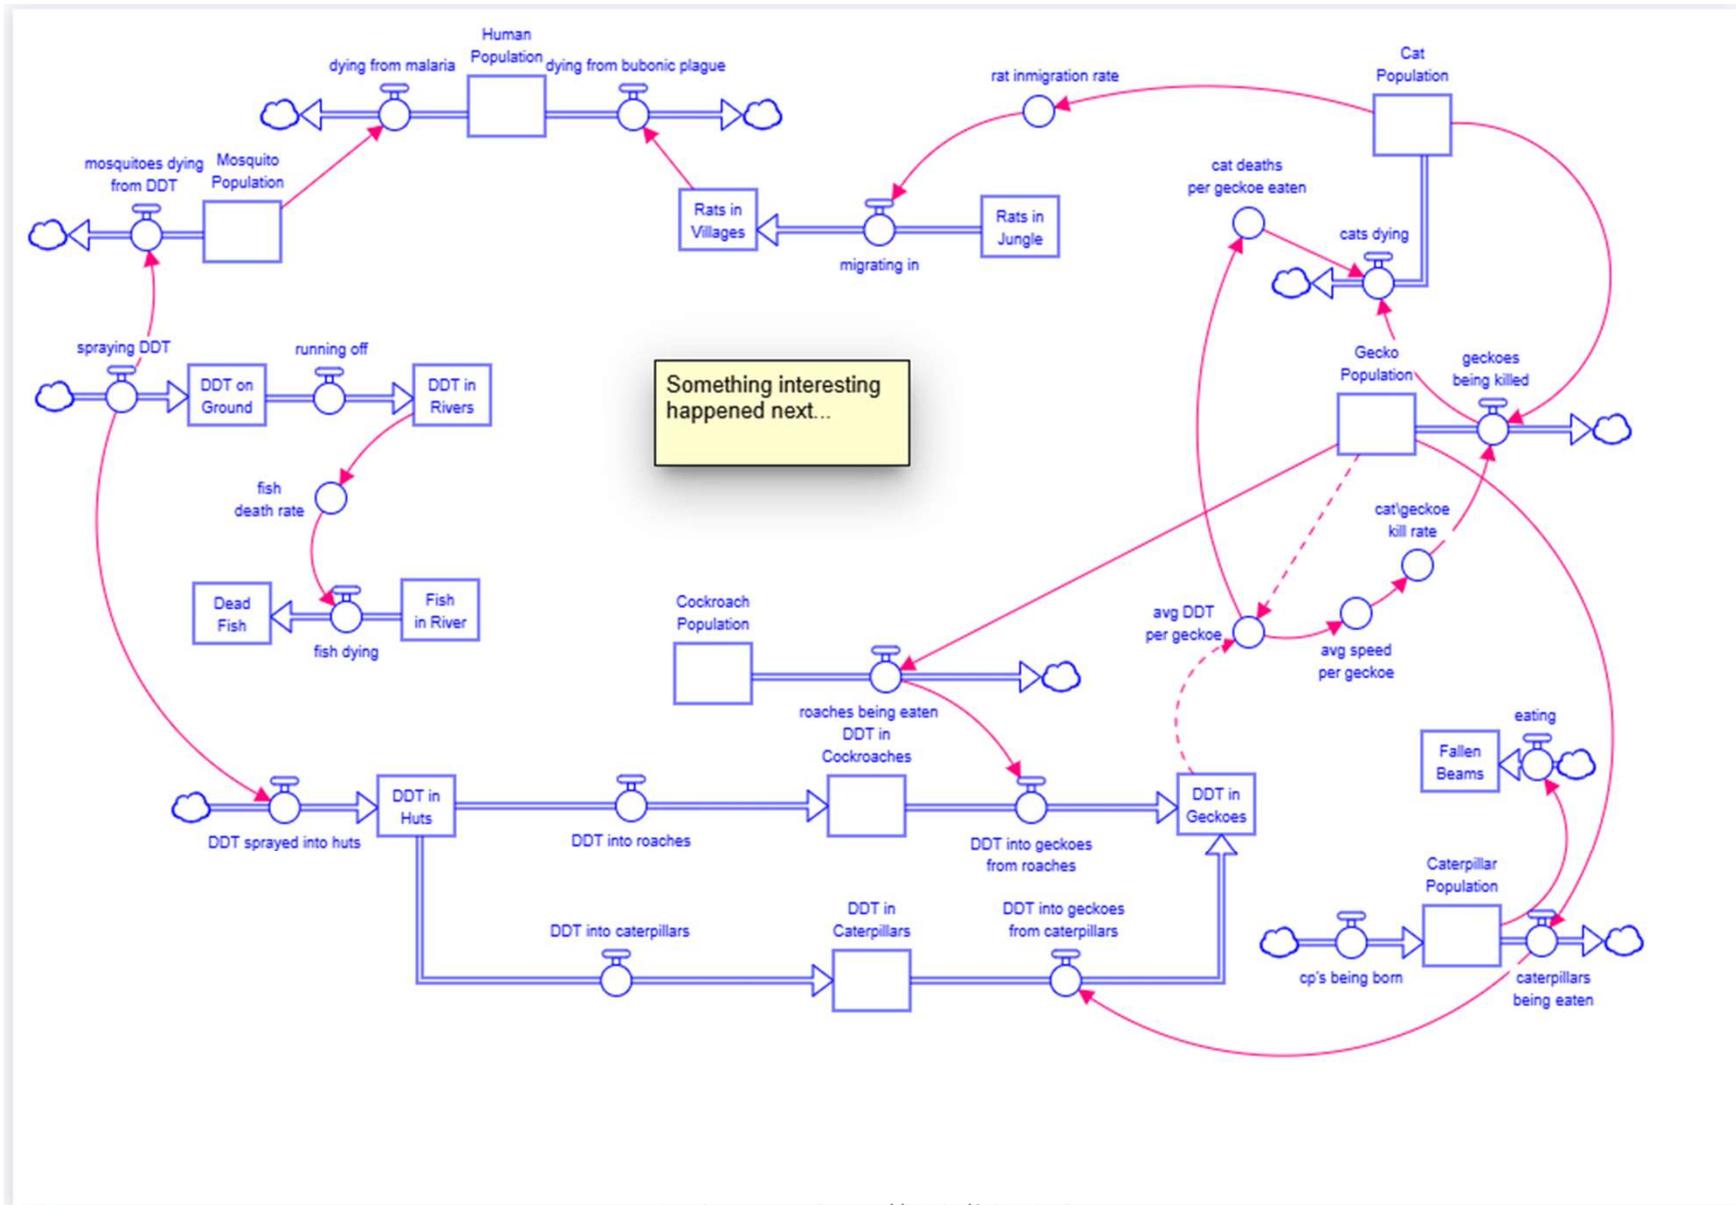

5. Calling Fab Network

THIS WAY:

- Ad hoc solutions
- Symptom control
- Silo thinking

HOW ABOUT THIS WAY

- Inclusion of local expertise
- Inclusion of a variety of disciplines (domain knowledge)
- Systems view, stocks and flows
- Structural solutions
- Qualitative model
- System Dynamics
- Gaming/Simulation

6. Impact-by-design

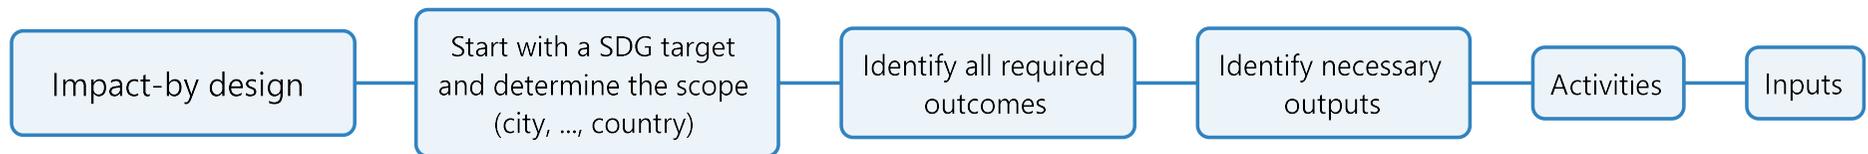

6. Impact-by-design

Inputs	The financial, human and material resources used in a programme or policy. For example, training materials produced.
Outputs	The immediate effects of programme/policy activities, or the direct products or deliverables of programme/policy activities. For example, the number of vaccines administered.
Outcomes	The likely or achieved short-term and medium-term effects of a programme or policy's outputs, such as a change in vaccination levels or key behaviours.
Impact	Positive and negative, primary and secondary long-term effects produced by a development intervention, directly or indirectly, intended or unintended. (OECD-DAC definition, 2010)

- The SDG targets describe the intended impact
 - Within the scope of a neighborhood, a city, a region, a country
- The best way to realize this impact is start your planning with it: impact-by-design

6. Impact-by-design

6. Impact-by-design

Fablabs and SDGs is a process passing various “maturity” stages. Fablabs decide themselves how they develop and at what speed. The last stage is “Accountability”; it implies committed to impact, which is accomplished by impact-by-design.

7. Power to the Network!

7. Power to the Network!

- Understanding our world
 - Perhaps a small step for a tech nerd, but a giant leap for those who've never worked with computers before. Keep it up!
 - Find a balance between planned operations and unexpected opportunities

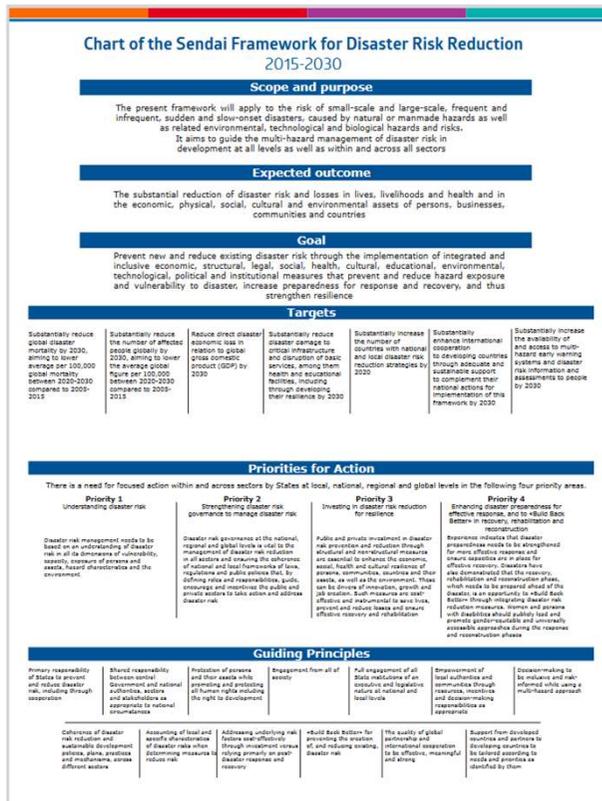

Zaplab, Canada LEAF, final meeting Klaaskreek, Suriname, 2026

7. Power to the Network!

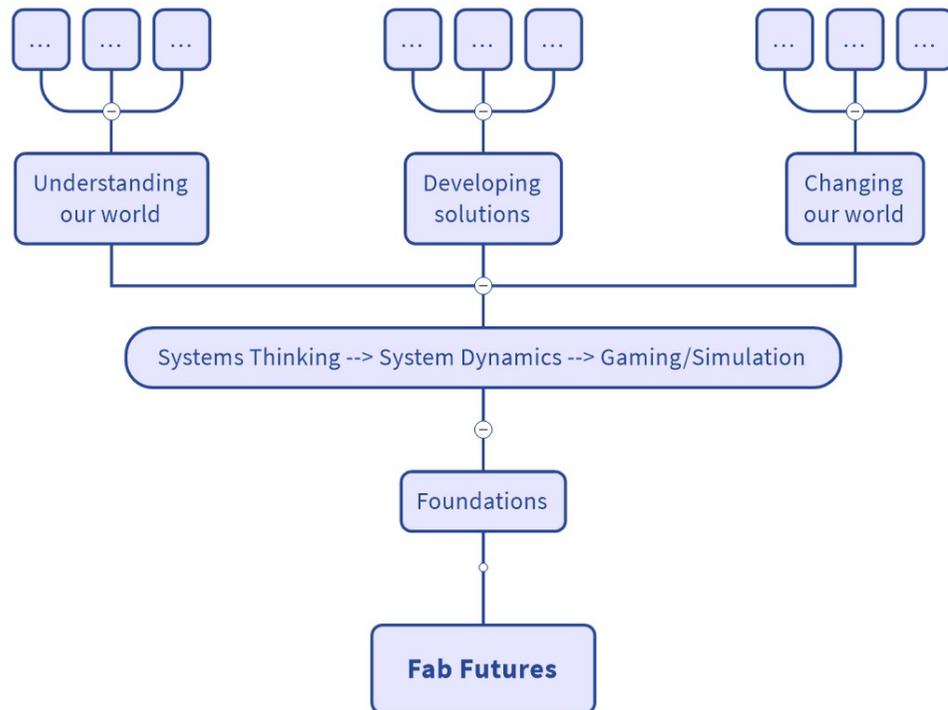

- Developing solutions
- Start generating ideas for SDG target related projects

7. Power to the Network!

- Changing our world
- Go forth and multiply your organization, not time 2, but times 50!

7. Power to the Network!

Recommendation:

- Give Fab Futures three pillars:
 - Understanding our world
 - Developing solutions
 - Changing our world
- Add Systems Thinking → System Dynamics → Gaming/Simulation to its foundation courses

Thank You!
